PROFESSIONAL SUMMARY

Motivated Full Stack and MERN Stack Developer with hands-on experience in Java, Spring Boot, React, Node.js, MySQL and MongoDB. Possess moderate knowledge of DSA by consistently practicing on LeetCode and HackerRank Platforms. Seeking an entry-level software developer role to contribute to scalable web applications and grow in a collaborative environment.

EXPERIENCE

Java & Python Full Stack Developer Intern

Feb 2026 – Jul 2026 | 6 Months

Vstan4U Technologies · Bengaluru, Karnataka · Internship

- Developed and maintained full-stack web application features using Java (Spring Boot) on the backend and React.js on the frontend.
- Built and consumed RESTful APIs for core application workflows — including user authentication, data submission, and reporting — using Spring Boot and tested endpoints via Postman.
- Designed and optimized relational database schemas in MySQL and worked with MongoDB for document-based storage; wrote efficient queries to support application data requirements.
- Implemented responsive frontend components with React.js and HTML/CSS, applying Bootstrap for consistent UI across devices and screen sizes.
- Contributed Python scripts for backend automation and data processing tasks, reducing manual effort in internal workflows.
- Collaborated in an agile team environment, participating in code reviews and version control workflows using Git and GitHub.

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, JavaScript (ES6+), HTML5, CSS3, React.js, Spring Boot, Express.js, Node.js

Databases & Tools: MySQL, MongoDB, GitHub, Git, Maven, Bootstrap 5, Figma

Cloud & Deployment: AWS, Vercel, Netlify, Render, Railway

Concepts & Practices: RESTful API Design, CRUD Operations, MVC Architecture, Responsive UI/UX, DSA

Certifications: Vstan4U Technologies · HackerRank · Infosys (AI) · IntelliJPad (Java)

PROJECTS

House Rental Platform

Java · Spring Boot · HTML · CSS · JavaScript · MySQL · REST API · Maven

- Architected and developed a full-stack property rental web application enabling landlords to list properties and tenants to search and apply — reducing manual rental coordination effort significantly.
- Designed and implemented 15+ RESTful API endpoints using Spring Boot, supporting complete CRUD operations for property listings, user profiles, and rental requests.
- Built a responsive, mobile-first frontend with HTML, CSS, and Vanilla JS; integrated form validation and dynamic content rendering to improve user experience across devices.
- Managed relational data with MySQL, designing normalized schemas for users, properties, and bookings; optimized queries to reduce average response time.
- Packaged and deployed the application using Maven and a cloud hosting platform, demonstrating end-to-end full-stack deployment capability.

Portfolio Website

React.js · CSS3 · Vercel · Responsive Design · Component Architecture

- Developed a personal portfolio using React.js with a reusable component architecture and improving long-term maintainability.
- Applied modern UI/UX principles (visual hierarchy, whitespace, accessible color contrast) resulting in a clean, professional interface that showcases 5+ projects and technical skills.
- Optimized application performance with lazy loading and efficient React state management; achieved cross-device compatibility across mobile, tablet, and desktop viewports.
- Deployed via Vercel with CI/CD integration, enabling zero-downtime updates and public accessibility with a custom domain.

Informer – AI-Powered Chatbot

HTML · CSS · JavaScript · External REST APIs · Responsive Design

- Built an interactive web-based chatbot integrating multiple external REST APIs to serve real-time information including news, weather, and general queries with automated natural-language responses.
- Implemented asynchronous API calls using Fetch API and async/await patterns, reducing response latency and ensuring smooth non-blocking user interactions.
- Designed a responsive, accessible chat interface with dynamic DOM manipulation, CSS animations, and keyboard navigation support, ensuring smooth accessibility across devices.
- Reduced average query response time through efficient API caching strategies and lightweight front-end architecture.

Mini Projects

- Sky-Cast Weather Dashboard** :- *React – Bootstrap - External REST APIs · Responsive Design*
- To-do-List App** :- *React – Bootstrap - Figma -- Responsive Design*
- Online Complaint Registration System** :- *HTML · CSS · JavaScript - Express.js*
- Tic-Tac-Toe** :- *HTML · CSS · JavaScript*

EDUCATION

Bachelor of Engineering in Computer Science

2022 – 2026

Dr. T. Thimmaiah Institute of Technology, affiliated to VTU University

CGPA: 8.5 / 10 — Top 10% of class

Relevant Coursework: Data Structures & Algorithms, Java Full Stack Development, Database Management Systems, Object-Oriented Programming, Computer Networks

ADDITIONAL INFORMATION

DSA Practice: Active problem solver on LeetCode and HackerRank; consistent practice in arrays, dynamic programming and sorting algorithms.

Interests: Open-source development, system design, building side projects, football, cooking.
